K FACTOR FILTER
FILTRATION SOLUTIONS

Your Innovative Filtration Solutions Provider

Media Filtration | Magnetic Separation | Oil Water Separators | Customized Solutions

PROVIDING GLOBAL MARKETS WITH CUSTOMIZED FILTRATION SYSTEMS

WE OFFER UNRIVALLED QUALITY AND SERVICE TO THE LEADERS IN INDUSTRY.

DELIVERING ENGINEERED SOLUTIONS TO THE MOST DEMANDING INDUSTRIES

ISO 9001 certified manufacturing ensures guaranteed High Performance:

- Maintenance free Media Filtration
- Complex Magnetic Filtration
- Oil Water Separation
- Custom Fabrication and Tooling

MEDIA FILTRATION

K-Factor Media Filters are fully automatic and self-cleaning industrial liquid filtration systems engineered and designed to suit applications in several industries where the removal of solids and contaminants from process liquids is required.
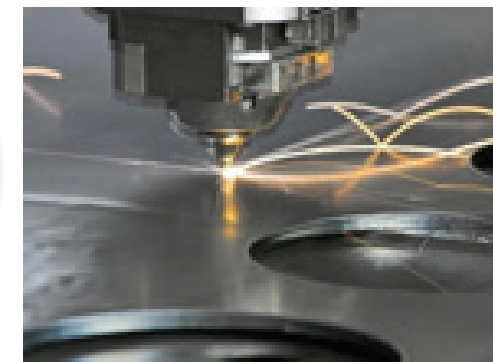

MAGNETIC SEPARATION

K-Factors' Maggie magnetic filtration system is the most effective means of removing challenging ferrous particles from industrial fluids such as coolants, lubricants, and wash solutions. The stainless-steel system is self-cleaning, fully automatic and fitted Inline to provide continuous operation. With magnetic strength of 10,000 Guass, the Maggie filters to 1 micron in liquid flows from 12 GPM and higher.

OIL WATER SEPARATORS

K-Factors' customized Oil Water Separators provide a wide range of flow and removal capabilities. Each K-Factor OWS system is tailor-made for customer conditions to maximize the removal of insoluble oil and petroleum products. K-Factor Oil Water Separators are versatile and provide standard setting solutions for oily wastewater with the dependability, efficiency, and ease of operation necessary to address your site-specific processes.

CUSTOMIZED SOLUTIONS

The K-Factor group of companies have the capability to plan, design, produce, and optimize your milling or fabrication project. Whether mild steel, stainless, aluminum, sheet metal, brass and copper we provide on-site consultation, engineering design and installation to meet all of your steel fabrication needs. CWB – Canadian Welding Bureau and TSSA – Technical Standards & Safety Authority members.
